

David, concerning Judas, who was the guide for those who arrested Jesus. He was numbered among us and was allotted a share in this ministry. He bought a parcel of land

an inch long gap between your starting and finishing place.

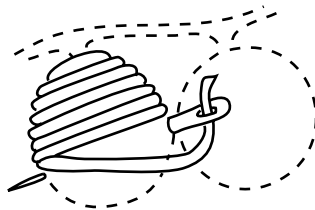

Find something fairly firm, like a wire coat hanger, or plastic tubing and feed it into the channel you've just sewn. This will hold the mouth of the windsock in a circle. Attach strings at three points around the rim of the windsock, tie them together at the top and make a loop for hanging.

I made a dozen of these one evening as part of the decorations for a wedding reception held in our back yard, and have used them several times since.

Some Useful Stitches:

Satin Stitch

Make straight evenly spaced stitches to fill in an area. If you want, you can outline the area with running stitch or some other stitch first.

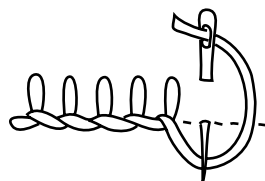

Couching

Lay a thread or yarn along the line of the design (like a letter or shape) and with another thread fasten it down along its length. This is a fast and easy way to form letters.

Buttonhole Stitch

This stitch can be used to sew another piece of fabric onto your banner, like a flame or a crown. It has a decorative effect, especially if the stitches are even in size and spacing.
